

Q1

int print Numbers

{

n=0

while (n ≤ 0)

{

print n

n=n+1

}

}

Q2.

int print Even

{

for (i=0 to 50)

{

if (i%2 == 0)

{

print i

}

}

}

Q3. int print Multiplication Table (int number)

{

n=1

until (n>15)

{

print (number * n)

n=n+1

}

}

Q4.	BEGIN
	Create file named nums.txt
	Write numbers "2 3 5 7" in the same line
	Read numbers from nums.txt into an array called numbers using: read-ra numbers < nums.txt
	n = LENGTH (numbers)
	FOR i = 0 to (n-1)
	PRINT (numbers [i])
	END
	FOR i = 0 to (n-1)
	PRINT (numbers [i] * 2)
	END FOR
	END.

Q5. BEGIN

FUNCTION divide (num1, num2) {

local ~~num~~ quotient

local remainder

quotient = num1 / num2

remainder = num1 % num2.

PRINT quotient rounded to 2 decimal places

PRINT remainder

}

CALL divide (x, y)

END

Q6. BEGIN

FUNCTION maximum (num1, num2) {

local max

IF (num1 > num2) THEN

max = num1

ELSE

max = num2

ENDIF

PRINT max

}

CALL maximum (x, y)

END

Q7.

BEGIN

FUNCTION checkDirectory (dir) {

IF (dir does not exist)

{

CREATE directory

}

ELSE

{

PRINT "Directory exists".

LIST files in dir

}

}

CALL checkDirectory ("<dirname>").

END

(Aug 18)

Q1.

BEGIN

PROMPT "Enter filename: "

READ filename

IF (filename exists)

{

PRINT "File exists"

IF (file is readable and ~~writable~~)

{

PRINT "File is readable" ~~and writable~~

}

ELSE

{

PRINT "File is not readable" ~~and writable~~

}

IF (file is writable)

{

PRINT "File is writable".

}

ELSE

{

PRINT "File is not writable".

}

6 }

ELSE

{

PRINT "File doesn't exist".

}

END

Q2.	BEGIN
	PROMPT "Enter filename: "
	READ filename
	IF (filename exists)
	{
	words: count number of words in filename
	lines: print count number of lines in filename
	characters: count number of characters in filename
	print words
	print lines
	print characters
	}
	ELSE
	{
	PRINT "File does not exist".
	}
	END.

Q3.

List contents of current directory

Sort files in descending order of size

Save first file as largest file

Get size of largest file

Print name and size of the Largest file.

Aug 19

Q1.

BEGIN

PROMPT "Enter filename: "

READ file

PROMPT "Enter word: "

READ word

IF (file exists)

{

FOR each line on file

{

IF (line contains word)

{

PRINT line

}

}

}

ELSE

{

PRINT "File does not exist".

}

END.

Q2.

BEGIN

INPUT number

FOR (i: 0 to 20)

{

product = number * i

PRINT number "*" i "=" product .

}

END

Q3.

BEGIN

GET current disk usage

PRINT current disk usage

IF (disk usage > 80%)

{

PRINT "Warning: Disk Usage is above 80%."

}

END.
